

Roblon Aramid Ripcord

Roblon Aramid Ripcord for cutting of corrugated steel tapes and cable jackets.

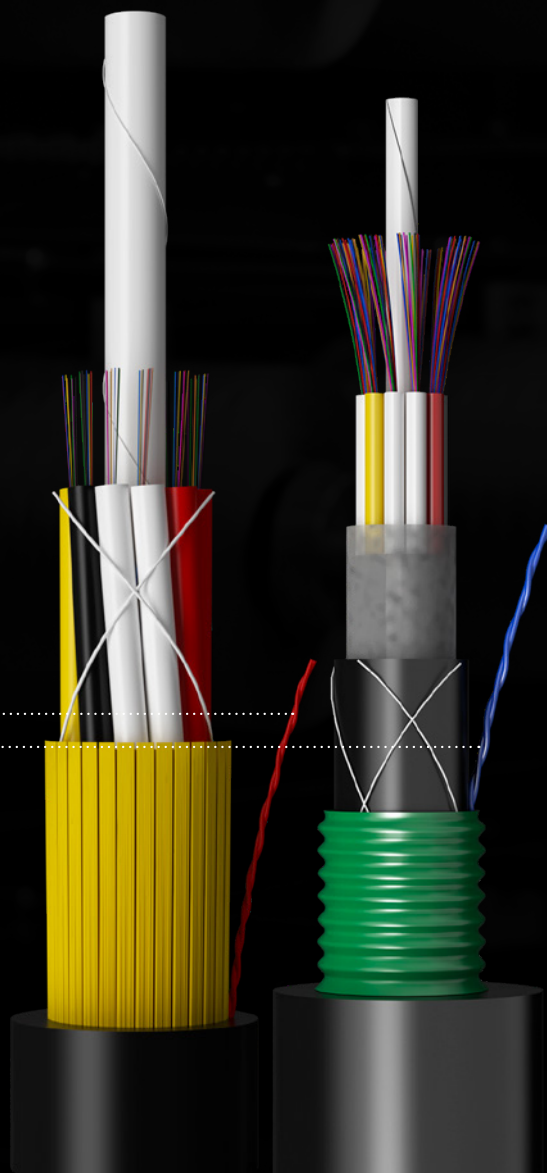

Roblon Aramid Ripcords can be used in any type of cable, allowing easy access to the cable core during installation or maintenance works. The Roblon aramid ripcord is ideal for cutting through corrugated steel tapes.

Roblon ripcords are also available in water-blocking (WB) versions. They are impregnated with water-blocking solutions which prevent the water from travelling along the ripcord, should water penetrate the cable jacket.

- Excellent cutting properties
- High and uniform cord quality
- Easy to trace
- Available in WB versions
- Available in coloured versions
