Interim Statement

In accordance with the regulations for listed companies' submission of interim statements, Roblon A/S hereby submits the interim statement for the period November 1, 2010 to January 31, 2011 (3 months).

As stated in the annual report 2009/10, Roblon has been introducing a major organisational change from the beginning of the new budget year 2010/11 and the changes have now been fully implemented.

We will focus on carrying through various activities based upon the new strategy process and the related strategy plan for global business development.

At the same time, we are constantly working on general efficiency improvement activities for the company and activities adjusted to the actual conditions and challenges.

Inertia on the markets as a consequence of the financial crisis can still be felt by some of the product segments within machinery and lighting. We have seen an increase in the number of quotations and order volume is larger than at the same time last year.

The development in revenue and result is as expected and Roblon A/S passed the first quarter satisfactorily.

There is no reason to adjust expectations for revenue and earnings for the budget year 2010/11.

Yours faithfully
Roblon A/S

Klaus Kalstrup
Chairman of the Board
